### **BOMBORA TECHNICAL WEEKEND CHALLENGE**

Do you fancy yourself as an innovative wave energy developer or hair brained inventor? Here is your opportunity to put your skills to the test against the best boffins in the industry.

Bombora Wave Power is pleased to announce that we are inviting groups to put themselves forward for an intensive technical engineering and water sporting challenge.

The event will be held at the stunning Llanion Cove, Outdoor Adventure Centre in the heart of the Pembrokeshire Coastal National Park, over the weekend of 7<sup>th</sup> (Friday evening), 8<sup>th</sup> and 9<sup>th</sup> June 2019. Accommodation, meals and equipment will be provided by Bombora.

Friday evening will consist of a welcome dinner where the challenge will be set. Teams will be asked to solve a technical challenge which will be judged on Sunday followed by a prize giving ceremony. Over the course of the weekend we look forward to enjoying a typical Aussie Barbie, some water sports and a visit to Bombora's purpose-built test tank to see the innovative mWave membrane being put through its paces.

Founded in Western Australia in 2012, Bombora is an award-winning ocean energy company committed to providing clean, renewable electricity technology. Bombora's globally patented mWave can produce environmentally-friendly, consistent and cost-competitive commercial scale electricity in coastal regions across the world.

This weekend event has been structured to encourage engagement and relationships with the broader industry, academic institutions and local community as well as challenge the mWave concept. We are hopeful that we can create opportunities for future working partnerships and employment.

We invite teams of up to 5 people to take part in this free challenge. A full weekend programme is planned with support and mentoring being provided by Bombora's team and external experts. Space is limited so applications will be taken on a first come first serve basis.

If you are up for the challenge then please contact Chris Williams at [chris@bomborawave.com](mailto:chris@bomborawave.com) for further details, rules and application form. The closing date for applications is Monday 6<sup>th</sup> May, 2019.
